Standard Operating Procedure (SOP) for Laundry

1. The laundry facility at NEIGRIHMS should be designed for efficiency in providing hygienically clean linen.
2. A laundry facility on the ground floor is to be partitioned into two separate areas - a "dirty" area for receiving and handling the soiled laundry and a "clean" area for processing the washed items. Ideal soiled and cleaned linen areas should be separated by a physical barrier. The partition (barrier) will be made of a non-porous material, should be from floor to ceiling, preventing air/dust contaminating the clean area.
3. A transit zone should be provided between dirty and clean areas of the laundry, where handling washing/drying and change of outer garment/PPE is carried out. A wash area should be placed between the clean and dirty areas, where staff can wash/sanitize before proceeding to the clean area.
4. To minimize the potential for re-contaminating cleaned laundry with aerosolized contaminated linen, areas receiving contaminated linen ideally should be at negative air pressure relative to the clean area (airflow should be from clean to dirty areas at all times).
5. Laundry at NEIGRIHMS will run minimum from 8AM to 5 PM on all days (365days) and in case of emergency/disaster 24x7.
6. Bidder has to maintain all equipment as per standard for 10yrs. with all required consumables and calibration.
